

Spreadsheet formatting

Take a look at the following spreadsheet which shows different text formats and table formatting.

Before formatting:

	A	B	C	D	E
1		Fly Away Balloon rides			
2		Summary of sales from January to June 2020			
3		Month	Total sales	Value of sales	
4		January	45	2250	
5		February	48	2400	
6		March	51	2550	
7		April	74	3700	
8		May	96	4800	
9		June	113	5650	
10					

After formatting:

The month column uses the **Text** format,

the Total sales column uses the **Number** format,

and the Value of sales column uses the **Currency** format.

The font, size, colour and alignment has also been changed and the data has been formatted as a table.
