Hints and Tips Unit 1

The information in this guide will be helpful to you when you are ready to complete your assessment for the following unit:

Unit 1: Principles of Cyber Security Level 2

Section 1 – Understand motivations for cyber crime

Q1. Describe the term 'Cyber crime'?

This question is quite straightforward. You simply need to describe what cyber crime is. What does it mean?

Q2. In the table below, explain the possible motives for cyber crime. You must give three examples.

For this question you should consider what it is that motivates people to commit cyber crime. What is that they want to achieve?

Q3. In the box below, Identify potential threat actors.

For this question you need to consider who the different threat actors could be. This is an identify question so you only need to list your responses.

Q4. In the table below, provide a definition for the following two terms

This question is straightforward and simply requires you to give a definition of what is meant by the term 'insider threat' and external threat.'

Q5. In the table below, describe the possible motivations that could lead to external and insider threats

This is a describe question so you need to provide good detail in your response. Think about what motivates people within an organisation to commit cyber crime? What is it that motivates people outside and organisation to commit cyber crime?

Q6. In the table below, explain what is meant by targeted and untargeted attacks.

This is an explain question so try to be as detailed as possible in your response. You should try to give examples of what targeted and untargeted attacks are to demonstrate your understanding.

Section 2 – Understand the need for cyber security

Q1. In the Table below, list common cyber crime vulnerabilities of the following:

- an individual
- a business
- a nation

For this question you need to consider the vulnerabilities of the three sectors listed. It is important that you take note that for businesses you need to consider charitable organisations, multi organisational and international organisations. Why are these particularly vulnerable?

Q2. In the Table below, describe the potential impact of cyber crime on:

- an individual
- a business
- a nation

What is the potential impact for all three sectors? As with question 1, for business you need to consider the potential impact on charitable organisations, multi organisational and international organisations.

Q3. In the Table below, explain the importance of cyber security for:

- an individual
- a business
- a nation

Why is cyber security important for all three sectors? As with questions 1 and 2, for business, you need to consider the potential impact on charitable organisations, multi organisational and international organisations.

Q4. In the box below, explain why cyber security issues should be reported promptly:

For this question you should consider why it is important to report cyber security issues promptly. What will this achieve?

Section 3 - Know about job roles within cyber security

Q1. In the box below, describe the role of key organisations in the cyber security industry.

For this question you should use the organisations mentioned in the course materials and describe the role that they play in cyber security.

Q2. In the box below, identify general job functions carried out by cyber security professionals.

This is an identify question so you can simply list your response. Try to give as many job functions as you can.

Q3. In the box below, provide a definition of the term 'hacking.'

This question is quite straightforward and simply requires you to define exactly what hacking is.

Q4. In the table below, explain the differences between the following.

- White hat hacker
- Black hat hacker
- Grey hat hacker

This is an explain question so try to provide good detail in your response. For each of the different types of hacker you need to explain what it is they do and why they do it.

Q5. In the box below, identify the key skill requirements of a cyber security professional.

This is an identify question so you can just list the key skills that are required to be a cyber security professional.
