

Linking information

To demonstrate how to create a hyperlink to a website the following instructions show the steps involved. For this example, we will link a specific word to the Vision2learn registration page.

The first thing to do when creating a link on a selection of text is to highlight the word that you are going to use for the link. Take a look at the steps you need to take below and then try this for yourself.

Step 1

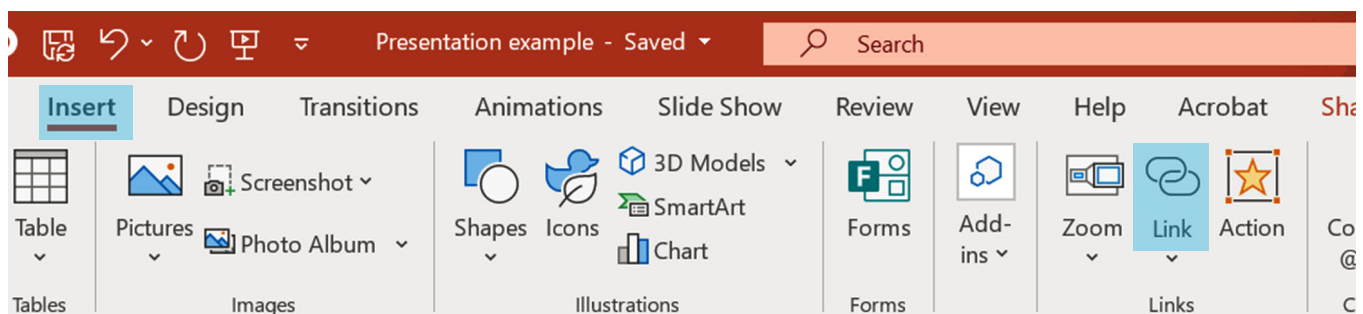

In the following sentence the word 'here' has been selected:

For more information on our products click **here**

Step 2

Now that you have highlighted the text you will use you need to open the link dialogue box.

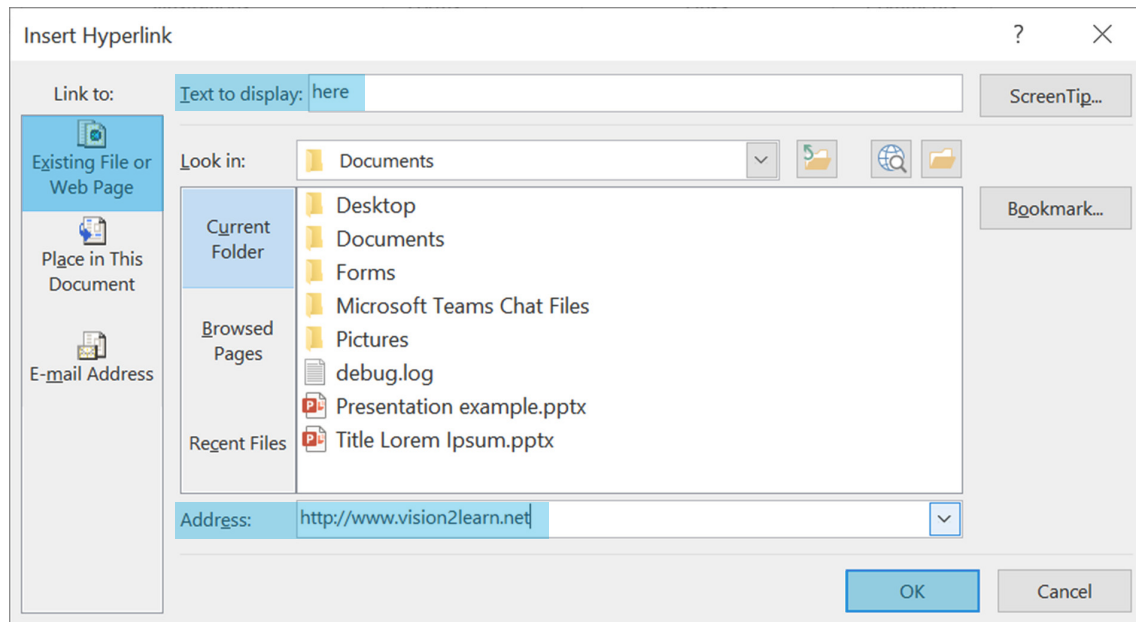

1. Click on the Insert tab
2. Select the links button and then click Link

Step 3

Once the link dialogue box is open you then need to create the link to the website.

1. Click on the Existing File or Web Page button which will allow you to add the website address that you want to link to.
2. Type the Text to display.

3. Type the website address that you want to link to in the address box
4. Click the OK button.

Step 4

Check that the link is working.

When the link has been created the text will turn blue. Hovering your mouse button over the text will show where clicking the link will take you. As you can see that clicking the link will open the Vision2Learn website.
