

Planning form

Name: Bill McKenzie

Date: 2nd April 2020

Task: To create a double-sided A4 size information sheet for an exhibition. The information sheet will be printed out to give to potential customers at the exhibition.

Deadline: 4th May 2020

Key outcomes / requirements:

- To create a double-sided A4 size information sheet, to include details of the hotel facilities, upcoming special offers, pictures of guest rooms and contact information.
- To have 1,000 copies of the information sheet printed no later than 4th May.

Information:

I will need the following information to help me complete this task:

- Details of the hotel facilities – I can get this from the company website.
- Information about upcoming special offers – As these offers change regularly, I will need to ask someone in the Sales Team for this information to make sure I include the most up to date offers on the information sheet.
- Pictures of guest rooms – I will need to ask someone in the Technical Team to help me with this. We have lots of pictures on the website, but I will need some help to get copies that are the right size and format for my information sheet.
- Contact information – I can get this from the company website. I will also double-check with my manager if I need to include contact details for a particular person in the Sales Team or just the general contact information.

Software:

Microsoft Word will be the most suitable software to use for this task, as it will allow me to combine text and images in one document. I am very familiar with the software, so should find it easy to put the information sheet. The Technical Team might need to use imaging software to help me get my pictures in the right format / size so that I can include them in the information sheet.

Skills and resources:

- I have all of the Microsoft Word skills needed to create the information sheet.
- I will need the skills of our Technical Team to help me format the pictures I need to include in my work.
- I will need to make sure that we have enough paper and printer ink to print 1,000 copies of the information sheet by 4th May.

Content, structure and layout:

I need to include the following content in the information sheet:

- Details of the hotel facilities
- Information about upcoming special offers
- Pictures of guest rooms
- Contact information.

I will also include a copy of the hotel logo at the top of the information sheet.

We have company guidelines that specify how documents should be laid out and formatted, so I will follow these guidelines when creating my information sheet.
