

Create a screenprint on a Mac

There will be times when you need to evidence your work. You can do this by taking a picture of your screen - this is known as a screenprint.

Follow these instructions to take a screenprint on a Mac:

1. Open the folder window or program you want to take a screenprint of.
2. Hold the Shift and Command keys, and press the number 3 to take a picture of the whole desktop.

3. Or, hold the Shift and Command keys, and press 4, a crosshatch symbol will appear, use your mouse to 'draw' around the window you wish to capture, let the mouse go to take the shot.
4. Open up a Word document. Go to the top menu bar and select Edit – Paste (or press the keys Command V). Your screenprint will be pasted in to the blank file.
5. To save your screenprint, select File – Save As from the top menu (or press Command S) and give your document a suitable name.

Once you have pasted a screenprint, you can use the Format tab to crop it into the right shape and size.
