Hints and Tips Unit 5

The information in this guide will be helpful to you when you are ready to complete your assessment:

Unit 5: Understand the importance of communication and project management in coding Level 2

Section 1 – Understand the importance of communication

Q1. In the box below, **explain** the importance of communication.

This question is quite straightforward and you simply need to explain why communication is important. Try to be as detailed as possible in your answer. Think about the importance of communication in business, teams and specifically why it is important when working in a coding environment.

Q2. In the table below: **describe** three different **methods** of communication and **identify** when to use each method.

Use the table to describe three different methods of communication. You should describe what the communication looks like, how it's used, when it's used and why it's the best method for a chosen situation. Try and convey a precise picture e.g. do not just state that it's best for meeting; include what type of meeting, how large the meeting is and where is likely to be held. Be specific in your description.

Q3. In the table below, give three **examples** of when communication should be adapted for different audiences. Ensure that you **explain** the importance of making the adaptations within your answer.

For this question you should think about the different a range of different audiences and how you could communicate the same information effectively with each. Give examples to demonstrate how communication would differ when to give information to your team members as opposed to giving information to senior managers or clients? Why does the communication need to be adapted for the audience?

Q4. In the box below, **define** what is meant by **active listening**.

This is quite a straightforward question and you simply need to state what active listening is.

Q5. In the table below, **describe** methods of **active listening**.

For this question you need to describe so try to provide good detail in your response. How can you actively listen? what ways can this be done? You should give at least 3 examples in your answer.

Q6. In the table below, **describe** ways of **verbally presenting** information and ideas clearly.

For this question you need to describe so try to provided good detail in your response. Think about a planning, the order information is given and also how much information is given and the type of language used.

Q7. Do some research to find an example of a *Software Release Note*. Use this research to help you to **explain** how release notes are used to communicate information to others in the box below.

As mentioned in the question you may want to carry out some research for this. What are release notes? What do they contain? Why are they important? You may want to give an example to support your answer.

Section 2 – Understand the purpose of feedback in developing communication skills

Q1. In the box below, **describe** ways of **seeking feedback** on communications.

Think about how can you find out if the information that you have communicated has been effective. What can you do to gather this information. Think about feedback from others in your team or organisation but you could also consider a wider audience.

Q2. In the box below, **explain the purpose** of using feedback to develop communication skills.

For this question you need to think about what you can do with the feedback you have been given. What will it help you to achieve?

Q3. In the box below, **explain** what is meant by **productive feedback**.

For this question think about what productive feedback is. What elements contribute to productive feedback.

Section 3 - Understand the principles of project management

Q1. In the box below, **define** what is meant by **project management**.

This question is quite straightforward and you simply need to give a definition of what project management is, what is the purpose of project management.

Q2. In the box below, **define** the role of a **Project Manager**.

For this question you need to consider the different responsibilities that a project manager has. What do they do? Think about both the short and long term responsibilities that they have.

Q3. In the table below, **Identify** the five principles of **Lean** project management.

This is an identify question so you don't need to go into great detail but don't just list the names of the five principles state what each principle means.

Q4. In the table below, **Identify** the principles of **Waterfall** project management.

As with question 3, this is an identify question so you don't need to go into great detail. You need to list each of the principles but you also need to state what the purpose of each step of the waterfall is.

Q5. In the box below, **explain** what is meant by the triple constraint.

This is an explain question so try and provide good detail in your response. There are three factors to consider for this and you need to ensure that you explain what each of them means and the effect they have on a project.

Section 4 - Understand Agile developments

Q1. In the box below, **define** what is meant by an Agile development.

For this question you should state what Agile development is, what is its purpose?

Q2. In the table below, **identify** the **key characteristics** of an Agile development.

This is an identify question so you need to list the key characteristics of Agile. Try and add as much detail as you can to demonstrate understanding.

Q3. In the table below, **identify** the **advantages** and **disadvantages** of an Agile development.

This question is quite straightforward and you simply need to consider what is good about working in Agile development and what is potentially bad about it.

Q4. In the box below, **describe** what is meant by Scrum.

For this question you simply need to describe what Scrum is. What is its purpose? You should also consider why it is used, what does it help to achieve.

Q5. In the table below, **explain** the following roles **within Scrum**.

There are three roles listed in the first column so for this you simply need to explain what each role does. You should also consider how each role affects the others. Try to provide good detail in your response.
