## Cyber Security Level 3

Unit 2

Learning  
outcomes

# Unit 2

## Learning outcomes

### 1 Understand cyber threat intelligence

- 1.1 Identify key concepts of cyber threat intelligence
- 1.2 Explain the following terms in relation to cyber security:
  - Threats
  - Exploits
  - Vulnerabilities
  - Risk
- 1.3 Describe the threat intelligence lifecycle
- 1.4 Describe how to find out about emerging attack techniques and how to recognise theme
- 1.5 Consider what could be included in Open Source Intelligence data sets
- 1.6 Explain why it is important to only use reliable and valid sources of Open Source Intelligence information
- 1.7 Explain the importance of using reliable sources of information in relation to cyber security threats
- 1.8 Consider the current threat status and make possible recommendations based upon cyber threat intelligence informatione
- 1.9 Analyse relevant cyber threat intelligence information requirements for an organisation

### 2 Understand threat models

- 2.1 Describe a range of threat models
- 2.2 Explain the steps within a threat model
- 2.3 Evaluate a threat model

### 3 Understand malicious software

- 3.1 Identify types of malicious software
- 3.2 Describe the effects of different types of malicious software on an infected system
- 3.3 Describe the motives for using specific malicious software attacks
- 3.4 Identify how specific malicious software attacks are made more effective due to human factors

**4 Know about social engineering**

4.1 Explain the term 'social engineering'

4.2 Give examples of how Open Source Intelligence can be used for social engineering

4.3 Describe ways a social engineering attack could take place
