Session 3 – Understand the importance of being diagnosed with a mental health problem	6

Hints and Tips Unit 4

The information in this guide will be helpful to you when you are ready to complete your assessment for the following unit:

Unit 4 - Understand the impact of children and young people's mental health concerns

Session 1 – Understand the impact mental health concerns can have on children and young people

- Q1.** In the table below, describe potential effects of mental health concerns on children and young people's:
- family life and relationships
 - education. [1.1]

For this question you must consider all three factors in your response, family life, relationships and education. Use your learning from page 2 of session 1 for guidance with this. You may also want to carry out additional research or you may have personal experience of the impact that it can have that you could use in your response.

- Q2.** In the table below, **identify** the potential impact of mental health concerns for children and young people in both the:
- Short term
 - Long term [1.2]

As with question 1 you must be able to identify both the short and long term impact of mental health concerns. Use your learning from session 1 page 2 for guidance with this. This is an identify question so you only need to list your answers.

Session 2 – Understand the impact of children and young people's mental health problems on others

Q1. In the box below, **describe** the impact on others of living with a child or young person with mental health concerns. [2.1]

For this question you need to describe the impact that living with a child or young person with mental health concerns can have. What affect does it have on parents/carers and also siblings? Use your learning from session 2 page 1 for guidance with this. You may also want to carry out additional research or have personal experience of the impact that this can have.

Q2. In the box below, **identify** the range of services that may be required to support positive mental health in children and young people. [2.2]

This question is asking you to identify the different services that can be available to which can support positive mental health. This is an identify question so you only need to list the different services that are available. Several are mentioned in session 2 page 1 but you may also want to do your own research on the different services that are available.

Q3. In the table below, **describe** how cultural beliefs and social attitudes can affect expectations of diagnosis of mental health concerns:

- for the child or young person
- for others. [2.3]

For this question you need to make sure that you consider both factors in your answers. Think about different cultures and social attitudes and how this can influence the potential to get a diagnosis. Use your learning from the course materials for guidance with this and the following website also has some additional information that you may find useful.

[Four Ways Culture Impacts Mental Health - Mental Health First Aid](#)

Session 3 – Understand the importance of being diagnosed with a mental health problem

Q1. In the table below, give reasons why it is important to seek support and a formal diagnosis. [3.1]

For this question you must fully complete the table and give three reasons why it is important to seek support and a formal diagnosis. What benefits will this have? Use your learning from session 3 page 1 for guidance with this.

Q2. In the box below, describe the barriers children and young people may face seeking a diagnosis. [3.2]

For this question you need to consider the barriers that children and young people may encounter when they are looking for a diagnosis, there are a number of reasons discussed on page 2 of session 3 which you can use to help formulate your answer. You may also have personal experience of these barriers that you could refer to in your answer.

Q3. In the table below, give reasons why children and young people may be reluctant to seek medical intervention and a formal diagnosis. [3.3]

For this question you need to give 4 reasons why children and young people don't want a formal diagnosis or seek medical intervention. Use your learning from session 3 page 2 for guidance with this.
