Hints and Tips Word Processing Unit

The information in this guide will be helpful to you when you are ready to complete your assessment for the following units:

Unit 73: Word Processing Software Level 2

Unit 1: Improving Productivity Using IT Level 2

Please note: As the IT course is predominately practical not all questions have need to be included in this guide. General guidance with some specific questions have been included where necessary.

The videos and practice documents that you have been provided throughout the course are an invaluable resource which have been designed to allow you to develop your skills and understanding of the tools and features of software.

Please try to make full use of these and if you are unsure of anything don't hesitate to ask your tutor for assistance.

Enjoy your course.

Section 1 – Entering and managing information

- Q1.** What different types of information might be included in a newsletter?
Please list at least 4 separate types of information.

For this question you covered different types of information in session 1 page 5.

Section 2 – Editing tools

Q1. For this question you need to consider the documents requirements for Style and Structure, please complete the table below.

When answering this question please ensure that you think about the kind of document that you have been asked to create when selecting a suitable template. when talking about style and structure you need to consider the various styles available and what would be appropriate as for structure, how have you structured the actual newsletter. you must complete all three parts of the question to fulfill the learning criteria.

Q2a. Identify at least three formatting techniques that you could use when creating your newsletter.

Q2b. How will this formatting enhance the appearance and meaning of the document?

In the first part of this question you need to identify at least 3 formatting techniques and then in the second part explain how they will enhance the meaning and appearance of the newsletter. make use that your explanation is clear and covers all three types of formatting.

Q4. Now check through the document and correct any spelling grammar errors that you find.

Write a description of the errors / quality problems you found in the box below.
(Please ensure that you describe the errors/quality problems, do not list or bullet point)
it is important that for this question you provide a description as a list or bullet points will require a resubmission.

Questions 5-9

you will need to apply a range of formatting techniques to the text in the newsletter. you will find it useful to check each task off as you go which will ensure that all of the tasks are completed correctly. if you are not sure of what is required, formatting was covered in session 3.

Section 3 – Structure and layout A

Questions 1 to 13

This section is all about the structure and layout of your newsletter. You need to use a range of tools to organise the information within your newsletter so that it looks professional.

Make sure that you use the line spacing and paragraph spacing effectively so that text is not split over two columns or pages.

You also need to add information to the header and footer of the newsletter. if you are unsure of any tasks you should refer to session 4 which covers structure and layout.

Section 4 – Combining information A

In this section you will carry out further tasks relating to the content, structure and layout of the newsletter.

You will be required to insert two images and a hyperlink to the newsletter, make sure that you resize the images so that they are consistent with the rest of the document but that they are still clearly visible.

When resizing images make sure that you use the corner controls to do this as it will ensure that the aspect ratio is maintained. If you are unsure of any of the tasks please refer to session 5.

Section 5 – Structure and layout B

Q1b. Your form should have the following options with a check box placed to the right alongside each option:

Forms look more professional if the check boxes and drop down lists are lined up using the 'tab' key. You should ensure that the editing restrictions are set to "filling in forms" as they will be set to "read only" by default.

When you have created the form make sure that the check boxes work before submitting your work and save the file as WP2 form.

Q2a. Replace each of the check boxes with a drop-down list containing the following options:

Please remember to finish off the drop down form by protecting it (not the whole document). Make sure that the check boxes and drop down lists work before submitting your forms. you should also ensure that you save this with the file name WP2 form final, otherwise it will just overwrite the WP2 form file.

Section 6 – Combining information B

- Q1. You have written a letter that you want to send to a large number of people. What tool or technique could you use to merge the letter with an Excel spreadsheet containing a list of addresses?

All you need to state here is the tool within Word that you use for this task.

- Q4. Insert the Mail Merge Address Block at the top left hand section of the letter. This should include the first name, last name and full postal address for each customer.

Remember to 'match fields' within your data source into the address block – all of the fields within the data source should be seen in the address of the completed mail merge.

- Q6. Take a screen print of the mail merge at this point so that it clearly shows the Merge fields (not the names and addresses) and paste it in the space below.

Make sure to display the <<address block>> and <<greeting line>> merge fields in your screenshot at step 6. Mac users should ensure that the screenshot shows the individual merge fields that make up the address block and greeting line.

- Q8. Take a screenprint of one of your finished letters and paste it in the space below. Make sure it shows all of your letter content. Use more than one screenprint if necessary.

To ensure that all of the letter content is showing you can zoom out within word which will ensure that the letter is displayed in full within the word window.

Section 7 – Quality control

- Q2.** Now carry out a final review of your newsletter and other documents and fix any quality problems. You should make amendments as required so that the final outcome is professional and fit for purpose. You also need to consider ways to make further improvements to your work. Write a description of any corrections/ changes that you have made in the box below as well as how your work could be improved.

For this question you need to describe clearly any changes that you made as listing or bullet pointing will result in a resubmission request. you must also consider at least one further improvement that you could make to your work.
