Hints and Tips Presentations Unit

The information in this guide will be helpful to you when you are ready to complete your assessment for the following unit:

Unit 57: Presentation Software Level 2

Unit 1: Improving Productivity Using IT Level 2

Please note: As the IT course is predominately practical not all questions have need to be included in this guide. General guidance with some specific questions have been included where necessary.

The videos and practice documents that you have been provided throughout the course are an invaluable resource which have been designed to allow you to develop your skills and understanding of the tools and features of software.

Please try to make full use of these and if you are unsure of anything don't hesitate to ask your tutor for assistance.

Enjoy your course.

Section 1 – Approaching a task

Q1. Describe the purpose of using IT for this task.

for this question think about the benefits that using IT has for completing this task, how will it make the document look? what other things does using IT for this task allow you to do?

Q2. Fill in the table below to create a plan for your task. You need to consider the methods, skills and resources required to complete the task successfully.

Your plan should relate to the task that you have been asked to complete and for each factor provide details of how you plan to complete the task.

What is the information/source materials required?

What skills and resources do you need?

What content do you need to include?

How are you going to structure and layout the information?

What are your priorities? (how long have you got to complete the task)

Q3. Can you think of any factors that may affect this task? Select 4 of the following factors and describe how they may affect the task.

You need to select four of the factors and then describe how each may affect the task you have been asked to complete. For example, Is there a budget? What is the timescale? Do you have the skills and capabilities to complete the task?

Section 2 – Creating your presentation

Make sure that when you create your presentation that you use sufficient slides. Don't place too much information on each slide. If you look at the presentation content file you will see that the information would be most suited to 8 slides.

Don't overuse animations as they can detract from the message.

When creating the chart try to use a line or column chart as a pie chart would not really be appropriate for this type of information. You should also ensure that you give the chart a title.

Section 3 – Making changes to your presentation

Make sure that you have saved the Presentation with the filename PS2 presentation complete so that any changes that you make in this part won't overwrite the original PS2 presentation file.

Q2. Use the Slide Masterview in PowerPoint to change the master styles on Slide 1 of your presentation template. Use the box below to describe the changes you have made.

When you make a change to the Masterslide make sure that your change will be visible. Changing the theme, background colour or font will be the most obvious.

Q6. Describe any legal or local guidelines / constraints that may affect this task.

This is a describe question so make sure that your answer is detailed and not in a list or bullet pointed. Try to think of the legal acts that affect your work as well as the local guidelines that the organisation may have when creating documents.

Q7. Explain how your presentation meets the needs of the sales team at The Fruit and Veggie People Headquarters.

For this question you need to think how your presentation will meet the needs of the sales team. What is about the presentation that will help them sell the products and generate new clients? Look at the text in brackets as this indicates the factors you need to consider.

Q8. Now it's time to give your presentation a final check! Begin by listing at least five things you should check in your presentation to ensure that it is suitable for viewing.

This question is asking for a list so you can bullet point or number your responses. Think about what you should check before you send over the presentation to the sale team. You covered this in session 6.

- Q9.** Now use your list from question 8 above to check your presentation. Make changes as necessary in response to any problems you identify in your presentation. Use the box below to list any problems you have identified and the changes you have made to ensure your presentation meets requirements.

Carry out a thorough check of your presentation and make a note of any of the changes that you had to make. Try not to say 'None' as there will always be things that can be improved.

- Q10.** Do you think that the IT tools used to complete this task were appropriate for the task and purpose? Explain why.

Why were the tools that you used appropriate for this task? What did PowerPoint allow you to do that another program couldn't. make sure that you explain why.

- Q11.** It's now time to Evaluate the strengths and weaknesses of your work. You must consider at least three of the factors below in your answer.

- Format
- Styles
- Structure and layout
- Quality
- Accuracy
- Clarity for audience

For this question you need to evaluate the strengths and weaknesses of your work in relation to three of the factors. You must consider both strengths and weaknesses in your answer. Take a look at session 6 page 3 for guidance with this.
