Coding Practices Level 3

Unit 5

Learning
outcomes

Unit 5 - Understand deployment, maintenance and configuration management

Learning outcomes / Assessment criteria

1 Know about deployment

- 1.1 Explain how to package an artefact
- 1.2 Explain the importance of deployment planning
- 1.3 Explain the difference between build and deploy
- 1.4 Identify the advantages and disadvantages of canary deployment
- 1.5 Describe what is meant by deployment strategy
- 1.6 Describe what is meant by continuous deployment
- 1.7 Identify what is meant by rollback strategy

2 Understand maintenance in coding

- 2.1 Identify the key elements of maintenance
- 2.2 Explain why documentation of maintenance is important
- 2.3 Explain the improvements that could be made in maintenance
- 2.4 Explain why change management is used in maintenance

3 Understand configuration management and version control systems

- 3.1 Explain what is meant by configuration management
- 3.2 Explain the tools and techniques used in configuration management systems
- 3.3 Explain the main features and benefits of version control systems
