Take a look at the presentation below to see how the Font and Paragraph groups can change a slide. How much difference have they made?

From humble beginnings

Fly Away Balloon Rides began life as a weekend hobby for Steve and Lynne, who were passionate about non powered flight. Over time, their passion grew and they decided to create a business that would allow others to experience the thrill of floating in the open air!

Since its creation several years ago, the company has experienced sustained growth and starting from a single balloon, which could carry up to four people, they now have several Balloons of various sizes which can accommodate groups of up to sixteen people at a time.

This year, they have added a specially adapted disabled access basket which ensures that the rides are fully accessible to all, as well as working with several children's charities to organise trips for disadvantaged groups.

In 2021 they are taking part in the African balloon race travelling the length of Africa from Marrakech to Cape Town, which promises to be the ultimate adventure!

“Up, up and away to where the air is clear and the earth just slides by beneath you.”

-Lynne White (CEO of Fly Away Balloon Rides)
