Hints and Tips Unit 1

The information in this guide will be helpful to you when you are ready to complete your assessment:

Unit 1: Safe and Effective Team Working

Section 1 – Understand how to work safely

Q1. In the case study on page 3 of the course material, Sonia has found some boxes that are placed in a dangerous position on the stairway. **Describe** the regulations, safe working practices and procedures that Sonia has applied.

To answer this question, you will need to be aware of the different regulations, safe working practices and procedures that are provided on page 3 of the course material. You will need to understand which ones apply to the scenario for Sonia and in your answer describe the key points of each: regulations, safe working practices and procedures. Name them in your answer and include why they are relevant to the scenario.

Q2. **Explain** what constitutes a hazard in the workplace

Within your answer state what a hazard is. Do not copy the definition directly, but re-word to show your understanding of what it is. It will be good to use examples in this answer, if you've any from your own workplace or experience you could include these. Include why a hazard needs to be dealt with and not ignored.

Q3. **Explain** what constitutes a risk in the workplace

Also include a definition in this answer, but again ensure that it's not copied. You could explain how a hazard might become a risk and why it's important that it's addressed quickly by employees. Do you have any examples from your own workplace or experience and how they were minimised?

Q4. This part of your assessment is within the course content on page 4, session 1.

Under Time for assessment you will find an image containing workplace hazards and the Unit 1 Section 1 Assessment – Risk Assessment document.

For this question, you will need to complete the risk assessment based on the image provided.

As part of your assessment you will need to download the risk assessment on page 4 of the course material. You will find it at the bottom of the page, under the heading 'Time for an assessment'.

Watch the video above this to see how a risk assessment is completed, what to include and why it's an important document.

Next, look at the image of the office, within the Time for assessment area on the page, and complete the risk assessment document based on what you see.

You will need to save the risk assessment to your own computer and upload it with your completed assessment.

Section 2 – Understand effective team working

Q1. Describe the characteristics of an effective team. Include at least 3 characteristics in your answer

For each characteristic that you include, ensure that you provide a description to demonstrate clear understanding of each one. You may give one example as long as at least three different characteristics are clearly described within it.

Q2. Identify at least five factors that contribute to effective team working

Here, you should name 5 different factors and include a sentence to provide a little information on each one.

Q3. Describe the importance of creating and maintaining effective working relationships

Within your description include why effective working relationships are important, how are they maintained and what's the benefits. You should also consider the consequences of not having or maintaining effective working relationship.

Q4. Explain how Belbin's team role theory is used in team building

Look the different roles within Belbin's theory on page 2 of the course content and the case study for Physical 3D. For your answer think about how Belbin's team roles are applied to a team and can be used to build the team/make it more effective. You could also consider the consequences of not using such a theory or getting it wrong.

Q5. Describe the importance of sharing knowledge, Information and performance measures with other people in the team and with other groups

Ensure that you include all three elements of this question within your answer – sharing knowledge, information and performance measures. Consider why each element is important and how it affects other people both within the team and outside of the team. You could also include the consequences when such information is not shared.

Q6. Describe the types of problem that can occur with working relationships. Include at least two different problems in your answer

Read the different types of problems on page 3 and the following case study. Use at least two of these problems and in your own words, describe each problem and how it affects working relationships – what are the consequences.

Q7. In the case study on page 3 (session 2) of the course material, Physical 3D encounter a problem with the new team. Describe the actions that have been taken to deal with the problem in working relationships

In the case study on page 3, a solution has been found the team's problems. In your answer for this question, describe in your own words, what actions were taken. How was the team affected. Also re-visit your answer to Q7 and think about how any similar actions could help rectify the problems that you described there.
