Section 4 – Eliminate variance from processes in the workplace	7

Hints and Tips Unit 2

The information in this guide will be helpful to you when you are ready to complete your assessment for the following unit:

Unit two: Business improvement tools and techniques

Section 1 - Continuous improvement techniques

Q1. What are the four main Kaizen principles?

Take a look at the course materials to remind yourself about the main principles of Kaizen. You must provide all four principles in your answer.

Q2. Complete the table to show how Kaizen techniques can make 'Spring morning' a leaner company.

When answering this question, you can use a workplace or organisation that you're familiar with, or the case study provided. Keeping in mind the seven different types of waste and the benefits of eliminating each of them will help you when answering this question.

Section 2 - Principles and techniques of workplace organisation

Q1. Using the table below, explain possible areas of weakness in the workplace outlined in the scenario and suggest any improvements that could be made. Your answer should reference each of the 5S or 5C improvements areas.

Make sure to use either 5S or 5C in your answer and that you don't mix terminology from both models.

Section 3 – Use visual indicators to improve the work environment

Q1. Identify elements that contribute to good visual management for each of the following stages.

For this question you have to identify elements that contribute to good visual management. You should try and think about effective visual indicators in your workplace or one you are familiar with as this will help you in your answer.

Q2. Prepare appropriate visual indicators for one of the scenarios below. Complete the table below explaining how you would go about doing this. Your answer should

Include which materials could be used, examples of possible visual indicators and why your chosen visual indicators are appropriate.

Looking back over some of the case studies in the course materials will provide good examples of how business introduce visual management techniques.

Section 4 – Eliminate variance from processes in the workplace

Q1. Describe the benefits of standard working methods.

Thinking about how a lack of standardisation in your day-to-day activities can make life difficult will help when it comes to answering this question.

Q2. Using the table below, prepare a standardised work document that suggests ways to eliminate variance for a chosen process where you work.

Remember, a standard operating procedure is a document which includes details about how tasks should be carried out in order to lower variability, as well as enhance consistency and improve efficiency within an organisation.
