

Creating Forms - Adding check boxes

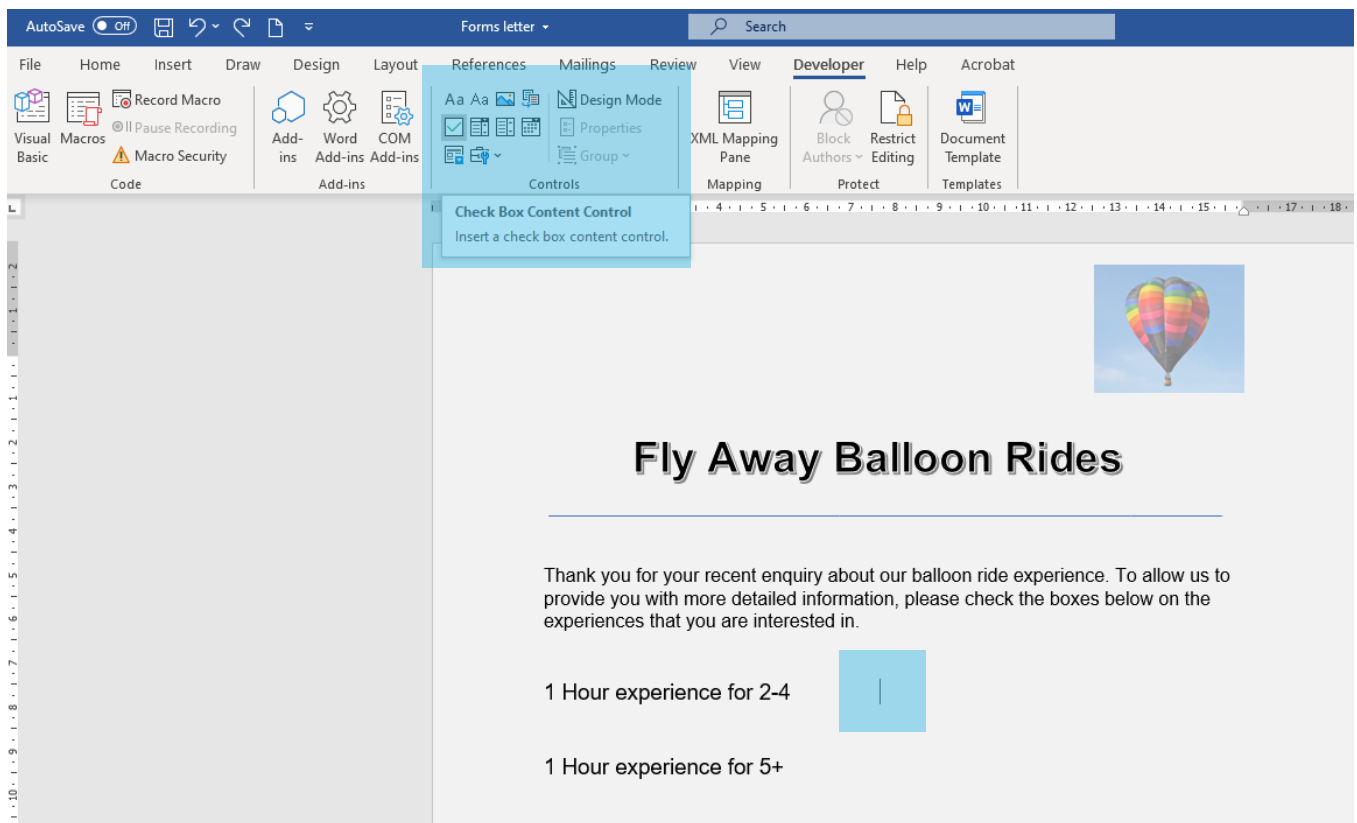

Step 1:

Open Form 1 and select the developer tab

Step 2:

Use the tab key to place the cursor to the left of the option that you are going to add a checkbox and Select the check box content icon from the control group.

Step 3:

This will insert a check box at the exact location of the cursor. Repeat this step to add a check box to each option.

Restrict Editing

Limit how much others can edit and format the document.

For example, you can prevent formatting changes, force all changes to be tracked, or allow only commenting.
