Hints and Tips Unit 3

The information in this guide will be helpful to you when you are ready to complete your assessment for the following unit:

Unit 3: Understand Legal and Ethical Aspects of Cyber Security Level 2

Section 1 – Understand key legislation related to cyber security

- Q1. Summarise key points of current legislation related to cyber security to protect:
- an individual
 - a business
 - a nation

For this question you need to ensure that you cover a minimum of three pieces of legislation. You should also include the data the act was created for example; The Data Protection Act 2018

Section 2 – Understand procedures to maintain data confidentiality and security

Q1. In the box below, describe ways to protect stored data.

This is a describe question so make sure that you provide good detail in your response. Think about the different methods that can be used to protect data. You could also mention how you protect your stored data.

Q2. In the box below, explain basic techniques for encrypting information.

There are two primary ways to encrypt information. You need to give the names of these and explain how each encryption method works.

Q3. In the box below, Describe the advantages and disadvantages of each encryption technique.

This question relates to the two methods that you provided in your response to question 2. All you need to consider is what are the advantages and disadvantages for each. Think about when you would use each type of encryption. Are there situations when one is better than the other? If so why is it better and why is the other not as good for that situation.

Q4. In the table below, define what is meant by the following:

- data in transit
- data at rest

For this question you simply need to provide details of what each term means.

What is data in transit?

What is data at rest?

Q5. In the box below, explain the security checks an organisation might undertake before releasing information

For this question you need to consider what an organisation may require when you are requesting information. You could use examples from your own experience of obtaining information or access to information. What security checks do organisations you may use have in place. what do they require you to do or provide before you can access the information?

Section 3 - Understand ethical conduct in cyber security

Q1. In the box below, describe ethical conduct within cyber security.

For this question you simply need to consider the conduct that would be classed as ethical when working in cyber security. Try to give examples if possible to demonstrate your understanding.

Q2. In the box below, describe unethical conduct within cyber security.

For this question your response should relate to the things that you should not do within cyber security. What would be classed as unethical conduct. Try to give examples to demonstrate your understanding.
