

Creating Forms - Adding drop down lists

There may be occasions when you need to include more options or require an exact figure. In this instance drop down boxes may be more appropriate. See the instructions below for guidance on how to create these.

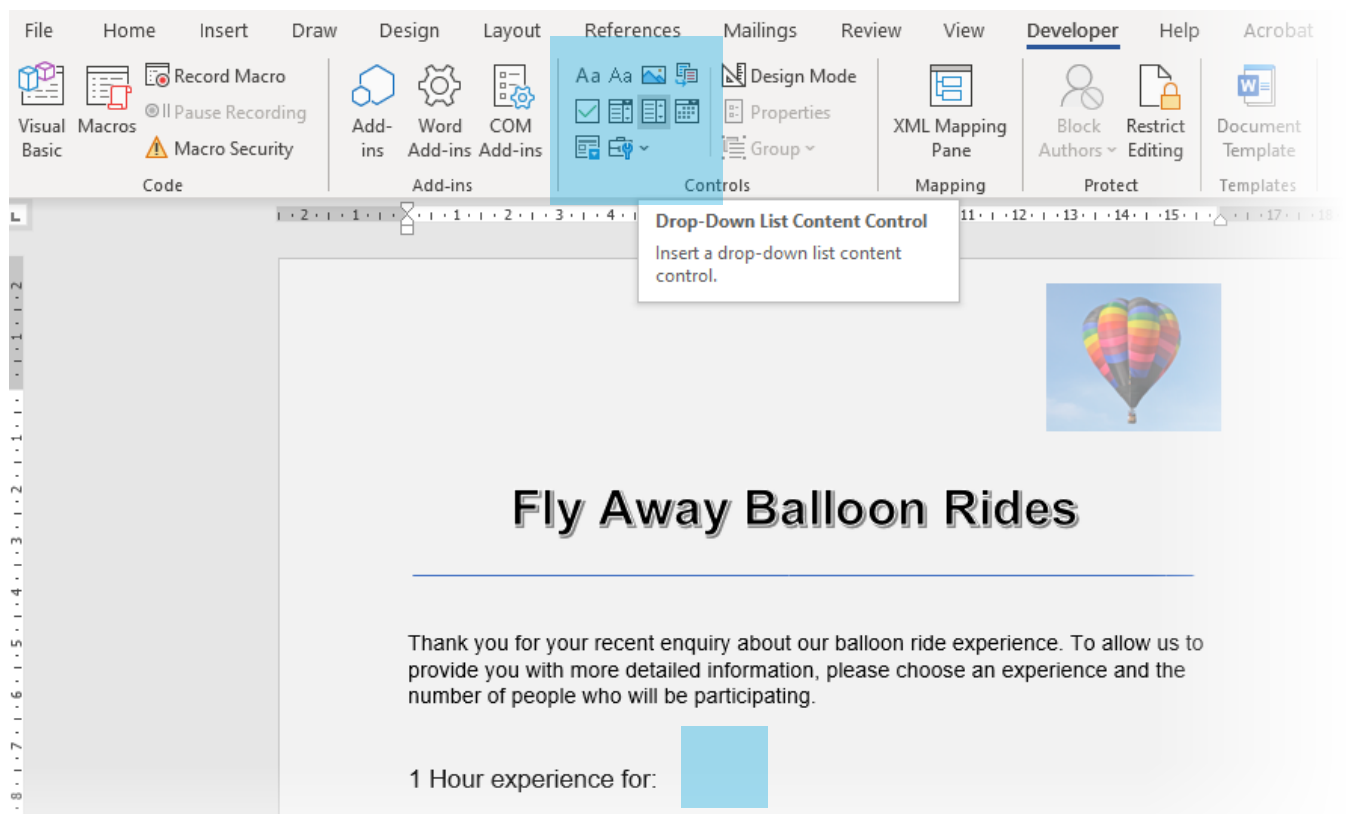

Step 1:

Open Form 1 and select the developer tab

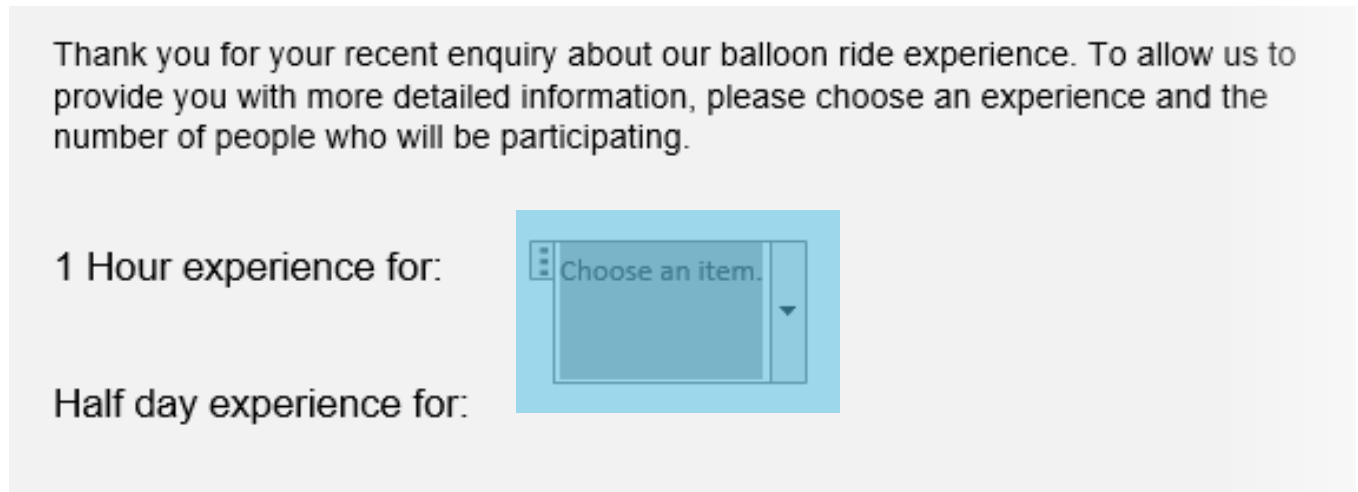

Step 2:

Use the tab key to place the cursor to the right of the option that you are going to add a drop down list and select the drop down content icon from the control group.

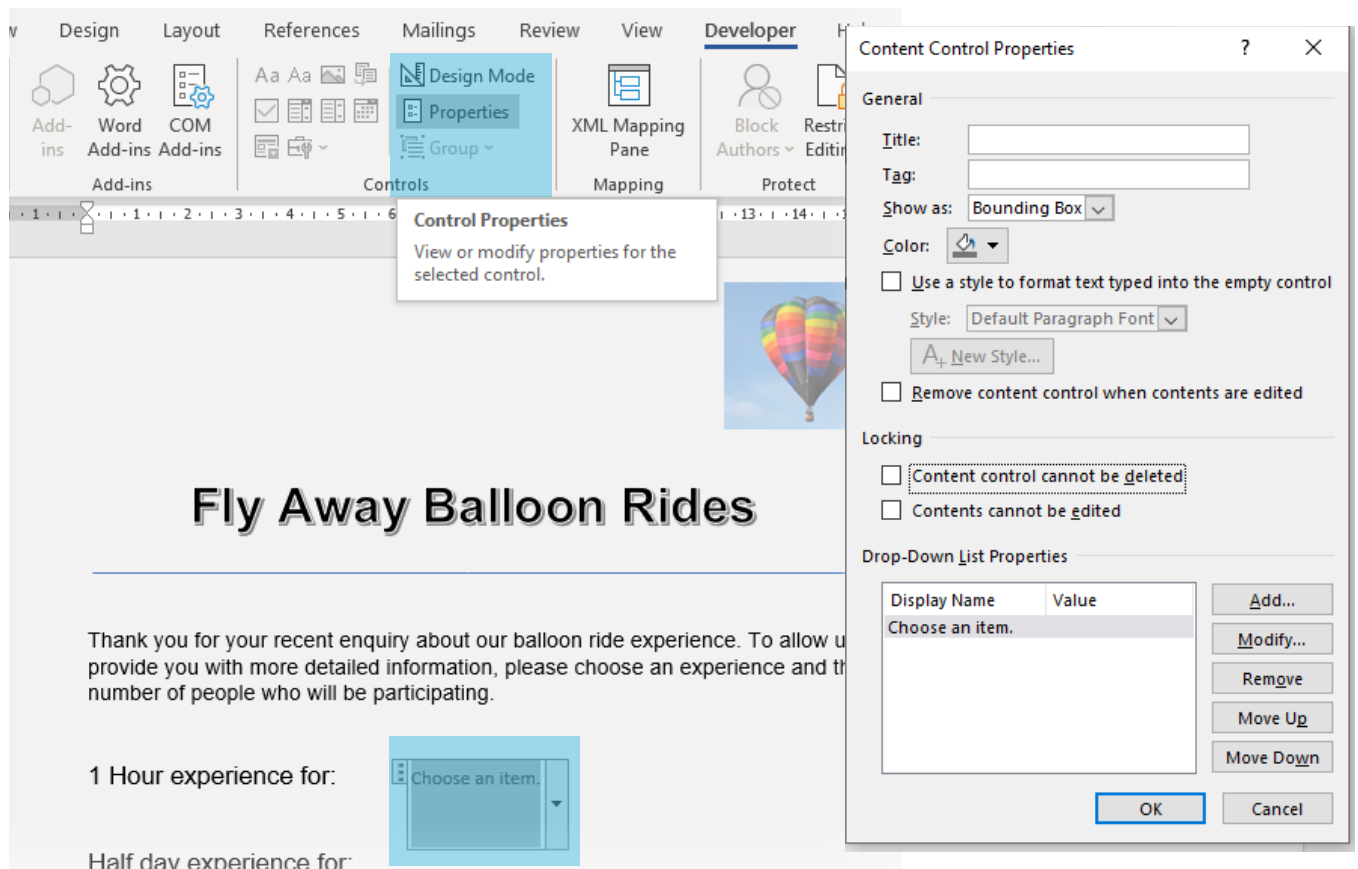

Step 3:

Click on this button and it will insert the drop down list into the document ready to be populated

Step 4:

Once the drop down has been added you need to populate it with the options that you wish to include. This can be text or numerical. For the example below you will only insert numbers. To add the numbers, you need to make sure that the drop down box is highlighted and then click on properties option in the control group panel.

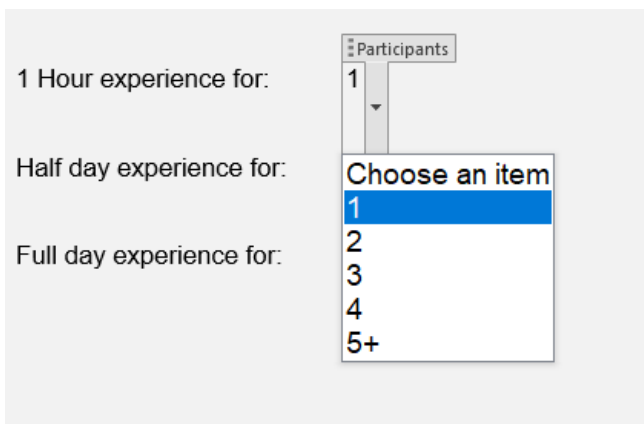

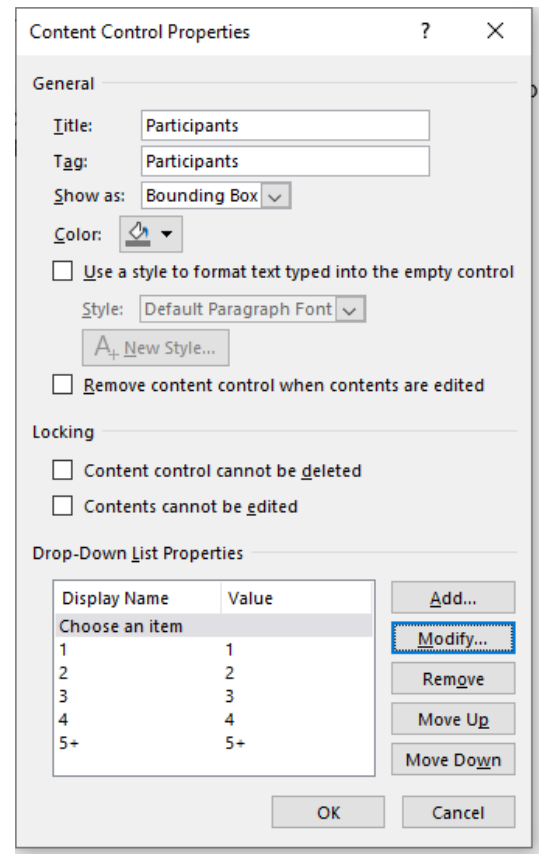

Step 5:

Once the content control properties dialogue box is open you can begin editing the options.

The first thing to do is give the box a title. Insert the text 'Participants' into the title box. You then need to add some numbers. Click on the add button and add the number 1 and click ok. Repeat this to add the numbers, 2, 3, 4 and 5+. Your properties box should look like the one in the screenshot to the right.

Once these have all been added click ok to close the content control properties box.

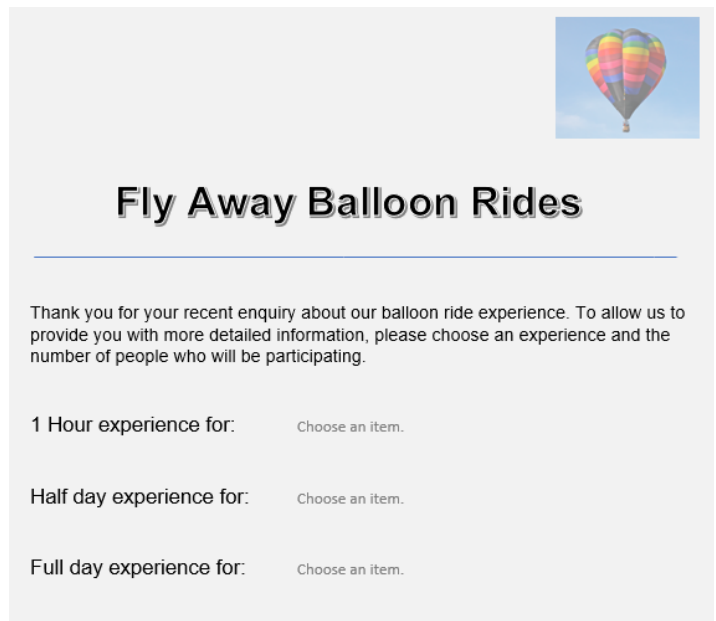

Step 6:

You should now have a dropdown list which can be clicked and the number of participants selected.

Step 7:

You now need to repeat the tasks from step 5 for the other options. However, as the drop down lists for all three experiences are the same, you can save time by copying the first drop down and pasting it alongside the other two.

Your final document should look like the one in the screenprint to the right.

Fly Away Balloon Rides

Thank you for your recent enquiry about our balloon ride experience. To allow us to provide you with more detailed information, please choose an experience and the number of people who will be participating.

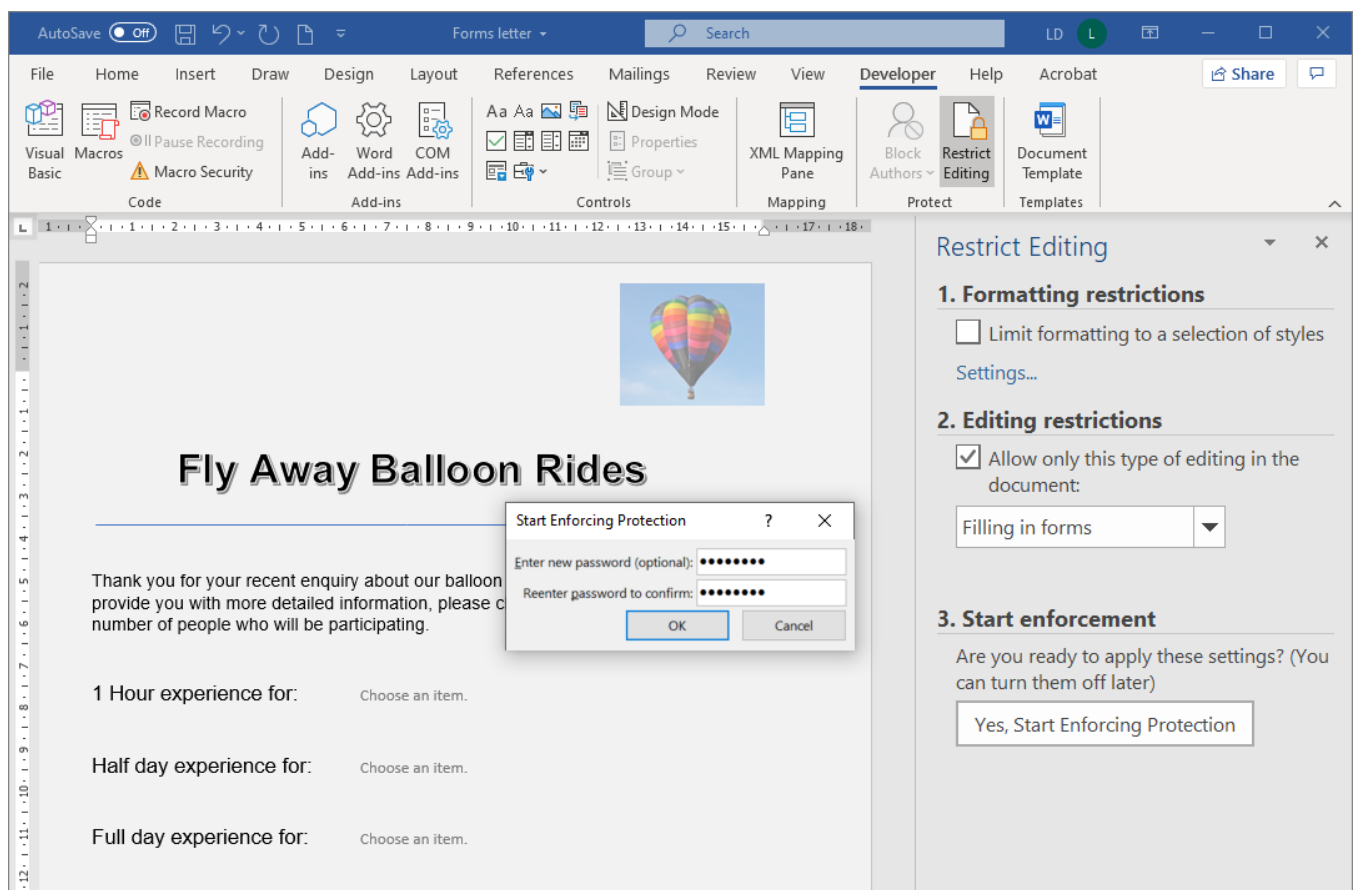

1 Hour experience for: Choose an item.

Half day experience for: Choose an item.

Full day experience for: Choose an item.

Step 8:

You now need to protect the document so that anyone completing the form is only able to make selections from the drop down lists. Select the restrict editing button on the toolbar, change the editing restrictions to filling in forms and then select 'Yes, Start Enforcing Protection'. Enter the password and click ok. Your form is now fully complete and protected.

The screenshot shows the Microsoft Word interface with the 'Developer' tab selected. The 'Restrict Editing' task pane is open on the right, showing the 'Restrict Editing' button. The 'Start Enforcing Protection' dialog box is open in the center, prompting for a new password and a confirmation password. The document content is visible in the background, showing the 'Fly Away Balloon Rides' form.

Restrict Editing

1. Formatting restrictions

☐ Limit formatting to a selection of styles
