Hints and Tips Unit 1

The information in this guide will be helpful to you when you are ready to complete your assessment:

Unit 2: Workplace Organisation

Section 1 – Understand workplace organisation

Q1. Explain the principles and techniques of workplace organisation

Include both Lean techniques and the 5S principles in your answer. Write about what each one is, what the stages and techniques are and why they are useful.

Q2. Describe the factors to be considered when selecting a work area for an activity

Include at least three different factors in your answer and ensure that you describe each one that you've included. Write about why it should be considered and the benefit of doing so.

Q3. Describe the benefits of having an organised working environment

Include at least three different benefits in your answer and ensure that you describe each one that you've included. Write about why each factor is beneficial. You could also include the consequence of not having each of the factors.

Q4. Explain how to score and audit a workplace organisation

Your explanation should include the use of 5S and explain how the principles are applied to a workplace audit. Think about the benefits of the principles, why they should be applied and the consequences of not having the principles for your audit.

Q5. Perform a workplace organisation audit using appropriate tools and techniques

In the Time for assessment area on page 4 of the course material, you have been given an image of a workplace. You should use this to perform your audit. The document to use for your audit is also included within the [Time for assessment – Workplace Audit Document](#). Complete this, save to your PC and upload it with your completed assessment.

Q6. Using the case study from page 4 of the course material and the workplace audit document that you completed in question 4, **provide** recommendations for:

a) What Sonia should include on a SOP for maintaining a clean and tidy office.

Using the information that you learnt in the video on page 5 of the course material and the audit that you completed in question 4, provide recommendations for what information is needed for creating a SOP (standard operating procedure). You should make at least 3 recommendations with detail for why you think they should be implemented.

b) What visual controls could be implemented to maintain a clean and tidy workplace

You need to recommend at least 2 visual controls that can be used to maintain the clean and tidy office environment. Your answer must include detail for why you are making the recommendations and how they will support the clean and tidy workplace.
